StockLOG — animals

SYNTHETIC ACCEPTANCE FIXTURE. AUD. Date/attribute filters select animals; their finances always cover the full lifetime. Unknown purchase prices make P/L incomplete. Active animals show costs/revenue to date, not a final sale outcome. Export dates use your display timezone. Property timezone Australia/Melbourne. Amounts are displayed to cents with reconciliation rounding; Excel also includes full-precision values.

Selection: Animals; Mob: August; Status: exited; Attributes: current; Filters: all
